Allowable Subject Matter

1. Claims 137-143 and 147-161 are allowable over prior art.

2. The following is an Examiner's Statement of Reasons for Allowance based on the Amendment filed on November 01, 2004.

As in claims 137, the prior art of record fails to teach or fairly suggest that an optical pickup device having the following feature:

(a) the aspherical refractive surface and the ring-shaped diffractive surface correct spherical aberrations due to difference in wavelength among the first, second and third fluxes and spherical aberrations due to difference in thickness of the transparent substrate among the first, second and third optical information mediums.

As in claims 148, the prior art of record fails to teach or fairly suggest that an optical pickup device having the following feature:

(a) the spherical aberrations due to different wavelength among the first, second and third light fluxes are corrected by a combination of a refractive power and a diffractive power of the objective lens.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
